PROFILE

Full-Stack Engineer with a proven track record of architecting and shipping **production-ready applications** for real clients — across **AI-powered SaaS platforms**, e-commerce systems, and data-driven web products.

Specialized in **React, Node.js, and Symfony** ecosystems. Deep focus on **REST API design, scalable architecture**, and **modern frontend engineering**. Experienced integrating **AI/LLM APIs** (Groq, Llama) and shipping full deployment pipelines on cloud platforms.

Trilingual (**EN / FR / AR**). Operates with **full autonomy** across the entire development lifecycle — from system design to production. Thrives in **remote-first, startup, and cross-functional team environments**. Open to international full-time opportunities.
